

B129 Braille Lightweight Advanced AGM Racing Battery

At only 9.5 lbs, the B129 Braille Lightweight Advanced AGM Racing Battery is a high-performance upgrade from a traditional lead acid battery. Offering weight reduction, more power output and lasting up to 2 times longer than traditional lead acid batteries!

BENEFITS:

- Superior starting capabilities with high cranking amp output per lbs
- Fast and efficient recharge, up to 2 times faster than traditional lead acid batteries
- Can be used in "Total Loss" (no alternator) applications
- Engineered for high shock and vibration applications
- Up to 2/3 weight reduction for equivalent cranking performance

PRODUCT INFORMATION

+ Physical Specs

| | |
|-------------------|-----------------------------------|
| Battery Chemistry | PB |
| Length (in) | 5.8" |
| Width (in) | 3.4" |
| Height (in) | 5.1" |
| Weight (lbs) | 9.5 |
| Terminal Type | Steel terminal block with M6 bolt |
| Polarity | Left + |

+ Technical Specs

| | | | |
|---------------------------------------|------|-----------------------------|--------------|
| 5 Second Pulse Cranking Amps | 813 | Charging Temperature | 0C to 50C |
| 10 Second Pulse Discharge Current (A) | 732 | Discharge Temperature Range | -40C to +60C |
| Voltage | 12 | Storage Temperature | -40C to +60C |
| Capacity (Ah) | 12.0 | | |
| Capacity (Wh) | 144 | | |

+ Charging

| | |
|----------------------------|---------------|
| Recharge Voltage | 14.4V - 14.6V |
| Maintenance Charge Voltage | 13.8V |

Rev 05-23
